

A NOTABLE DIFFERENCE

You can't be like the world to win the world. There should be a notable difference between how you live and how the world lives. There should be a notable difference in the very atmosphere around you because of My glory surrounding you. My presence surrounding you should be a constant irritation to all demons who come near you.

My holiness is a component of your new nature. It is the radiance of that holiness which should disturb the darkness of the sin nature in others. They should feel a difference when they are near you. Some should be so bothered by that holiness that they do not like being around you because they have gone so deeply into the sin nature.

Many churches have grown and are very large because they have copied the atmosphere of the world in their services, and there is no clear, distinct difference between the presence in those churches and the presence found in the world. Revival churches will be a habitation of My presence in every service. Revival churches will not be a pleasant place for carnal and lukewarm Christians. Revival churches will not be popular to the lost or backsliders who are seeking a religious experience in a worldly atmosphere.

My question to you is: Do you want a revival church? If so, you must first have revival in your own heart, then join with others of like heart and focus, and your church will explode with My glory and great moves of My Spirit.
